JOURNAL OF APPLIED ELECTROCHEMISTRY **24** (1994) 1285–1290

Index to Volume 24 (1994)

The subject index has been organized into topics for easy reference.

Subject Index

Corrosion and protection

A submerged impinging gas jet for corrosion and electrochemical studies, 1
Inhibition effect of sodium boro-gluconate on mild steel with and without nitrate ions in low chloride containing water, 179
Corrosion behaviour of Ti-6Al-4V in phosphoric acid, 250
Comparative study of copper behaviour in bicarbonate and phosphate aqueous solutions and effect of chloride ions, 344
Inhibiting and accelerating effects of aminophenols on the corrosion and permeation of hydrogen through mild steel in acidic solutions, 355
Preparation of electrolytic ceramic films on stainless steel conversion coatings, 554
Non-toxic organic zinc corrosion inhibitors in hydrochloric acid, 779
Corrosion and inhibition of aged 347 grade stainless steel boiler tubes, 803
Behaviour of Al-Sn alloy on the negative side of the open-circuit potential, 814
Studies on the influence of chloride ion and pH on the electrochemical behaviour of aluminium alloys 8090 and 2014, 911
Inhibition studies in sweet corrosion systems by a quaternary ammonium compound, 943
Potentiodynamic estimation of the degradation of 347 grade SS superheater tubes
Part III Use of a portable cell for *in-situ* evaluation, 977
Influence of the composition of zinc-ethyl silicate paints on electrochemical properties, 1013
Corrosion inhibition of amorphous FeBSiC alloy in 1M HCl by 3-amino-1,2,4-triazole, 1139
Electrochemical cell design for *in situ* measurements in condenser tubes, 1153
Inhibition of aluminium corrosion in chloride media: an impedance study, 1158
Behaviour of sodium silicate and sodium phosphate (tribasic) as corrosion inhibitors for iron, 1244

Effluent and water treatment

Anodic oxidation of cyanide on a reticulated three-dimensional electrode, 509
Decolourization of dye-containing solutions by electrocoagulation, 785
In situ oxidative degradation of formaldehyde with hydrogen peroxide electrogenerated on the modified graphites, 936
Reduction of chromate in dilute solution using hydrogen in a GBC-cell, 1028
Electrochemical treatment of bisphenol-A containing wastewaters, 1052
Electrochemistry and the environment, 1077
Electrochemical polishing of hydrogen sulphide from coal synthesis gas, 1092
Long service life IrO_2/Ta_2O_5 electrodes for electroflotation, 1262

Electrocatalysis and kinetics

Electrochemical hydrogen discharge characteristics of Pd and Pd-Ni-Rh alloy hydride electrodes catalysed by Pd/Pt-black coatings, 38
On the role of surface functional groups in Pt carbon interaction, 58
The electroreduction of molecular oxygen on preferentially oriented platinum electrodes in acid solution, 119
Preparation and characterization of thin films of $LaNiO_3$ for anode application in alkaline water electrolysis, 149
Origin of ohmic losses at Co_3O_4/Ti electrodes, 189
Electrocatalytic oxidation of methanol and C1 molecules on highly dispersed electrodes
Part I Platinum in polyaniline, 219
Sulpher content and the hydrogen evolving activity of NiS_x deposits using statistical experimental strategies, 233
A polyacrylonitrile-based gelled electrolyte: electrochemical kinetic studies, 298
Kinetics and mechanism of oxygen evolution reaction at oxide coated Co-Ni amorphous alloy electrodes, 310
Inhibition of the hydrogen evolution reaction on aluminium covered by 'spontaneous' oxide, 325
Electrochemical reduction of silver thiosulphate complexes
Part II Mechanism and kinetics, 396
Anodic film growth on Ru/Pt electrodes in $HClO_4$ and HCl solutions, 426
Effect of surface protonation on the voltammetric behaviour of para–chlorobenzophenone on glassy carbon, 460
Kinetics and mechanism of the electrochemical reduction of molecular oxygen on platinum in KOH: influence of preferred crystallographic orientation, 531
Electrochemically assisted metal uptake by cation exchange based chemically modified electrodes, 548
Voltammetric behaviour of the copper(II)-thiourea system in sulphuric acid medium at platinum and glassy carbon electrodes, 564
Cathodic behaviour of antimony(III) species in chloride solutions, 758
Kinetic study of electrochemical reactions at catalyst-recast ionomer interfaces from thin active layer modelling, 863
Voltammetry and anodic stability of a hydrous oxide film on a nickel electrode in alkaline solution, 878
Electrocatalytic oxidation of methanol and Cl molecules on highly dispersed electrodes
Part II Platinum-ruthenium in polyaniline, 1019
Electrocatalytic behaviour of a poly(n-methylaniline) filmed electrode to hydroquinone, 1164
Electrocatalytic properties of doped nickel boride based electrodes for the hydrogen evolution reaction, 1267

Electrochemical engineering

Studies of three-dimensional electrodes in the FM01-LC laboratory electrolyser, 95
Mathematical modelling of electrode growth, 212
A boundary element method for transient diffusion, 261
Performance characteristics of a certain class of electrolysers, 316
Scale-up of a bipolar electrode stack dimensionless numbers for current bypass estimation, 469
Coplanar interdigitated band electrodes for synthesis
Part I Ohmic loss evaluation, 475
Dynamic analysis of charge transport in fluidized bed electrodes: impedance techniques for electro-active beds, 481
Current efficiency in the chlorate cell process with an oxygen cathode(III): a gas analysis method for chlorate current efficiency, 503
Limiting current density and specific energy consumption in electrochemical cells with inert turbulence promoters, 525
Fluctuation analysis in electrochemical engineering processes with two phase flows, 593
Electrochemical observation of instabilities of the Belousov-Zhabotinskii reaction in CSTR, 647
Study of pulsing flow in a trickle bed using the electrodiffusion technique, 670
Mathematical reactor modelling for coupled chemical and electrochemical processes: the ECE system, 703
An electrochemical hydrocyclone cell for the treatment of dilute solutions approximate plug-flow model for electrodeposition kinetics, 745
Oxygen trickle-bed electrode as a cathode for chlor-alkali electrolysis, 751
Optimal time-varying cell-voltage control of a parallel-plate reactor, 1116
Calculation of bypass currents in molten salt bipolar cells, 1124
Detection of damaged membranes in alkali chloride electrolysers, 1201
Electrolytic process optimization by simultaneous-modular flowsheeting, 1206
Dynamic behaviour of an electrolyser with a two phase solid-liquid electrolyte
Part I Spectral analysis of potential fluctuations, 1228
Dynamic behaviour of an electrolyser with a two phase solid-liquid electrolyte
Part II Investigation of elementary phenomena and electrode modelling, 1235

Electrochemical synthesis and production

Oxidation of iodide to iodate concurrently with evolution of oxygen at kelgraf composite electrodes, 107
Electrochemical copolymerization of aniline and para-phenylenediamine on IrO_2-coated titanium electrode, 166
Production of tartrate and glycolate from the electrochemical reduction of glyoxylate, 271
Direct electrodeposition of poly(pyrrole) on continuous carbon–loaded microporous membrane films, 283
Electrochemical reduction of polyaromatic compounds, 337
Electrochemical reduction of benzaldehyde using Pt-Pb/Nafion® as electrode, 434
Electrooxidation of benzyl alcohol at high surface area nickel (NiS_x) electrodes in alkaline solution, 449
Polymer electrolyte type electrochemical ozone generator with an oxygen cathode, 489
Electrochemical production of cuprous oxide and metallic nickel in a two-compartment cell, 542
Reduction of 1-nitroso-2-naphthol at a Ti/ceramic TiO_2 cathode in different media, 559
Coplanar interdigitated band electodes for electrosynthesis
Part II Methoxylation of furan, 719
Preparative scale synthesis of *O*-glycosides and of a disaccharide by electrochemical oxidation of phenyl-*S*-glycosides, 725
Production of D-arabinose in a pilot plant fluidized bed electrochemical reactor, 930
Electrosynthesis of toluidines using thermally coated Ti/TiO_2 electrodes, 965
5,4′-dimethyl-2-methoxydiphenylether: a new product from the anodic oxidation of 4-methylanisole, 989
Electrical properties of polyaniline films formed in acid with and without Cs^+ ions in the electrolyte, 1059
Electrochemical production of lead chromate and sodium hydroxide in a two-compartment cell, 1146
Studies on the anodic decomposition products of sulfamate, 1182
Electrochemical synthesis of erythrosin from fluorescein, 1188
Comparative evaluation of electroreduction of nitrobenzene and *m*-dinitrobenzene on Ti/TiO_2 electrodes in H_2SO_4, 1256

Electrochromism

Spectroelectrochemical behaviour of poly (3-octylthiophene): application to electrochromic windows with polyaniline and iridium oxide, 72

Energy conversion batteries and fuel cells

Hydrous oxide species as inhibitors of oxygen reduction at platinum activated fuel cell cathodes, 30
Effect of gelling on the open circuit potential against time transients of $Pb/PbSO_4$ electrodes at various states of charge, 44
Cathodic codeposition of alloyed materials for use in lithium battery negative electrodes, 66
Electrochemical characterization of lithium-boron composite, 78
Performance of carbon-cloth bound porous-carbon electrodes containing an electrodeposited platinum catalyst towards the electrooxidation of methanol in sulphuric acid electrolyte, 85
Mechanism of the solid state battery: magnesium/poly(thionaphtheneindole/gold), 114
Design of a dome-shaped aluminium water battery, 145
A simple and novel method for preparing $Ni(OH)_2$
Part I Structural studies and voltammetric response, 256
Studies to improve the Li/SO_2Cl_2 cell, 288
Surface modification of an MCFC anode by electrodeposition of yttrium, 368
Effect of carbon dioxide on the performance of Ni/PTFE and Ag/PTFE electrodes in an alkaline fuel cell, 575
Electrochemical characteristics of hydrogen storage alloys modified by electroless nickel coatings, 808

Further studies of zinc-air cell employing a packed bed anode
Part III Improvements in cell design, 858
Anodic film on lead-arsenic alloy in sulphuric acid medium, 894
I npedance measurements of some doped Mno_2 electrodes in H_2SO_4 electrolyte, 917
Laboratory techniques for evaluating solid oxide fuel cells, 970
A study of the delay effect in $SOCl_2$ batteries, 1001
Ionic conductivity and lithium electrode stability in hydrin: $LiBF_4$ elastomers, 1066

Instruments, methods and analysis

A CO_2 titration electrode
Part I Theoretical description, 8
A CO_2 titration electrode
Part II Development of the sensor, 14
Development of an electrochemical workstation for monitoring the fermentation of beer, 521
A photophysical technique for the measurement of local oxygen concentration near an electrode surface, 652
The integrity of ultramicro-stimulation electrodes determined from electrochemical measurements, 835

Mass transfer and hydrodynamics

Mass transfer at rough gas-sparged electrodes, 139
Effect of flow characteristics on the diffusion-limited current density in an electrodeposition cell, 303
Application of metallic foams in electrochemical reactors of filter-press type
Part II Mass transfer performance, 384
Experimental studies of momentum transfer in a gas-liquid system in the vicinity of an agitated vessel wall, 602
Investigation of the wall region of gas-liquid flow using an electrodiffusional technique, 607
Liquid-wall shear stress in stratified liquid/gas flow, 612
Experimental comparison of electrochemical and dotpaint methods for the study of decaying swirling flow, 619
Electrodiffusion diagnostics of wall shear stresses in impinging jets, 626
Study of mass transfer in viscoelastic liquids by segmented electrodiffusion velocity probes, 632
An experimental study of the frequency response of electrochemical sensors in nonhomeogeneous flow in packed beds, 639
Local enhancement of liquid-to-wall mass transfer by a single gas bubble, 658
Determination of local hydrodynamic parameters in bubble columns by the electrodiffusion method with oxygen as depolarizer, 666
A three-segment electrodiffusion probe in axisymmetric flow with stagnation and separation, 676
Electrochemical study of mass transfer in decaying annular swirl flow
Part I Axial distribution of local mass transfer coefficients, 685
Turbulent mass transfer in small radius ratio annuli, 737

Materials electrochemistry

Solderability assessment via sequential electrochemical reduction analysis, 18
Influence of heat treatment of CrO_3-graphite intercalation compounds on subsequent electrochemical intercalation of sulphuric acid, 245
Synthesis and electrochemical properties of an oxide electrode layer prepared by a new electroless plating technique, 411
Effect of polypyrrole film on the stability and electrochemical activity of fluoride based graphite intercalation compounds in HF media, 455
Sparking at cathode tools during electrochemical machining in flow-through cells, 767
Measurement of anode potentials at high current densities in $NaNO_3$ and $NaClO_3$ media by the current interruption method for metals used in aviation technology, 798
Modification of carbon electrodes by a nitrate-based treatment, 870
Pressure dependence of limiting current density of sparking during electrochemical drilling, 883
Codeposition of SiC powders with nickel in a Watts bath, 993
A composite electrode for studying powdered electroactive materials: preparation and performance, 1037
Numerical simulation of two-dimensional fluid flow in electrochemical drilling, 1170
Preparation and electrochemical characteristics of a new Li-Mn-V-O system formed from heat-treatment of a MnO_2, NH_4VO_3 and $LiNo_3$ mixture, 1176

Metal and alloy deposition and dissolution

Effect of ion implantation on the electrochemical behaviour of electrodeposited zinc and chromated zinc layers, 52
Local structure and concentration in Al-Mn alloy electrodeposits, 131
Nucleation and growth of nickel by electrodeposition under galvanostatic conditions, 201
Effects of saccharin and aliphatic alcohols on the electrocrystallization of nickel, 227
Kinetics of lead deposition in fluorosilicate electrolyte
Part II Inhibiting effect of horse-chestnut extract (HCE) and of sodium lignin sulphonate-HCE mixtures, 332
Effect of some variables on the electroplating of zinc from acidic acetate baths, 350
Synergistic effects of benzalacetone and benzophenone on the electrocrystallization of tin from acid stannous sulphate solutions, 404
Effect of complexing agent (citric acid) and pH on the cathodic deposition of As-Sb alloys, 439
Polymer electrolyte type electrochemical ozone generator with an oxygen cathode, 489
Surface morphology and crystal orientation of electrodeposited tin from acid stannous sulphate solutions containing various additives, 569
Mechanism of the reverse dissolution of zinc in the presence of nickel
Part II Influence of triethylbenzylammonium chloride, 713

Effects of metallic and D2EHPA impurities on nickel electrowinning from aqueous sulphate baths, 730
Chromium coating on tin partially precoated steel sheet, 888
Effect of additives on anomalous deposition in zinc-cobalt alloy electrogalvanizing, 900
Nucleation and growth of copper on glassy carbon and steel, 906
Simultaneous underpotential deposition of lead and thallium on poycrystalline silver-III, 981
Cathodic process in copper-tin deposition from sulphate solutions, 1009
Properties of Zn-Ni alloy deposits from ammonium baths, 1249
Effects of diffusion-limited mass transfer on metal underpotential deposition voltammograms, 1276

Mineral and metallurgical electrochemistry

Electrochemical stripping of gold from Au-Ni-Cu electronic connector scrap in an aqueous solution of thiourea, 157
Direct electrorefining of copper scrap using a titanium anode-support system in a monopolar cell, 206
Industrial applications of a mathematical model for the zinc electrowinning process, 377
Anodic behaviour of copper during electrorefining using a rotating ring-disc electrode, 420
Interaction of Galena with hydrosulphide ions under controlled potentials, 513
Factors affecting the electrochemical behaviour of copper anodes under simulated electrorefining conditions, 953
Effect of chromate ion on zinc electrowinning from acid sulphate electrolyte, 1044
Effect of operating conditions on anode passivation in the electrorefining of copper, 1109
Anodic leaching of tungsten alloy swarf: a statistical approach, 1191

Molten salt electrochemistry

On the origins of cathode hyperpolarization effects in electrolytic fluorine production from KF.2HF melts, 195
Cyclic voltammetry at a metallic electrode: application to the reduction of nickel, tantalum and niobium salts in fused electrolytes, 361
Electrolysis of $MgCl_2$ with a top inserted anode and an Mg-Pb cathode, 791
Specificity of anodic processes in cyclic voltammetry to the type of carbon used in electrolysis of cryolite-alumina melts, 827
Characteristics of titanium deposits by electrolysis in molten chloride-fluoride mixture, 923
Fundamental study of the anodic and cathodic reactions during the electrolysis of a lithium carbonate-lithium chloride melt using a carbon anode, 1102

Solid state electrochemistry

Recycling of carbon dioxide using a proton conductor as a solid electrolyte, 126
A hydrocarbon sensor using a high-temperature-type proton conductor, 268
Electrical conductivity and oxygen semipermeability of terbia and yttria stabilized zirconia, 1222

Photoelectrochemistry

Photoelectrochemical properties of bismuth–doped titanium oxide electrodes, 1133

Thermodynamics and properties

Electrochemical reduction of silver thiosulphate complexes
Part I Thermodynamic aspects of solution composition, 239
Determination of diffusion coefficient of yttrium in Ni_2Y phase, 321
Thermodynamic descriptions of oxygen redistribution in a nuclear fuel pellet: heat of transport of oxygen in mixed conductors, 390
